

Risk Acknowledgment

Techtegrity LLC — OpenClaw Concierge

This document outlines the inherent risks associated with deploying an AI assistant with system-level access. The undersigned client ("Client") acknowledges understanding and acceptance of these risks.

1. Nature of AI Assistants

OpenClaw is an AI-powered assistant that can execute commands on the client's computer, access files, send messages, interact with web services, and perform automated tasks. While powerful, AI systems can produce unexpected or incorrect outputs. The Client acknowledges that no AI system is infallible.

2. System Access Risks

Granting an AI assistant access to system commands, file systems, and messaging platforms carries inherent risk. Misconfigured automations, unintended command execution, or AI misinterpretation of instructions could result in data modification, data loss, unintended communications, or other consequences.

The Service Provider mitigates these risks through careful configuration, testing, and the implementation of safety guardrails. However, the Client acknowledges that risk cannot be entirely eliminated.

3. Third-Party API Dependencies

OpenClaw relies on third-party APIs and services for its integrations. These services may change their APIs, terms of service, pricing, or availability without notice. The Service Provider is not responsible for disruptions caused by third-party service changes.

4. Custom Bridge Applications

Where custom bridge applications are built to connect services not natively supported by OpenClaw, these applications are provided "as is." While built with care, they may require updates as underlying services evolve.

5. Data and Privacy

While OpenClaw runs locally, the Client acknowledges that: (a) AI model providers may process prompts sent to their APIs according to their own privacy policies; (b) integrations with third-party services transmit data to those services; (c) messaging platform integrations may be subject to those platforms' data retention policies.

6. Limitation of Liability

The Service Provider shall not be liable for any indirect, incidental, consequential, or punitive damages arising from the use of OpenClaw, including but not limited to data loss, business interruption, or unintended communications. The Service Provider's total liability shall not exceed the fee paid for the setup service.

7. Acceptance

By signing below, the Client acknowledges that they have read and understood the risks described in this document and agree to proceed with the OpenClaw Concierge service.
