

OpenClaw Concierge

Your AI chief of staff — a fully autonomous assistant that runs on your hardware, manages your communications, and executes tasks across every platform you use. Deployed, configured, and tailored to your

\$5,000 – \$15,000

The final price depends on how much setup and integration is needed, how much training you want, and whether custom bridge apps are required to connect your tools. Once people start seeing how powerful it is, they want it to do more — and the scope grows with their ambitions.

What It Can Do

- **Computer Control**
Full access to your file system, shell commands, and script execution. It works the way you work — no hand-holding
- **Browser Automation**
Form filling, data extraction, research, and web tasks — handled autonomously in the background while you focus
- **Multi-Platform Messaging**
Reach your AI via WhatsApp, Telegram, Slack, Discord, Signal, or iMessage. It goes where you go.
- **50+ Integrations**
Gmail, GitHub, Spotify, Obsidian, calendar apps, and more — all connected and authenticated out of the box.
- **Persistent Memory**
It learns your preferences, remembers context across conversations, and gets smarter the more you use it.
- **Community Skills**
Access a growing library of community-built capabilities via ClawHub, or commission custom ones built specifically for
